megaShop™ Shop Floor Collection

CONFIGURABLE

SCALABLE

POWERFUL

megaShop™ is an extremely configurable, robust and scalable Shop Floor Data Collection platform that integrates with Symbol and Windows Mobile devices in batch, radio-frequency and RFID configurations. With megaShop™ you can track labor, track manufacturing jobs, light assembly, WIP locations, and feed the resulting information to the WMS and ERP system. megaShop™ supports all of the basic transactions in for tracking Work in Progress (WIP) in the warehouse: Job Issues, Labor tracking, Issues to workcenters, WIP Movements, and Assembly transactions while providing a detailed transaction history log for reporting and traceability. In addition, megaShop™ supports kiosk-style entry for entering shop floor data. And since megaShop™ connects to most popular ERP and accounting systems, all of the information generated at the warehouse is automatically updated to the accounting system through our scheduler, megaSched™. megaShop™ is a nice addition to megaTrak to provide end-to-end shop floor data collection.

FEATURES

- megaShop™ supports basic production transactions: Job Issues, Specific Issues, Job Receipts to Finished Goods and WIP Location Tracking on both the PC and Hand-helds.
- megaShop™ supports optimized picking through directed picks, bulk picks and zone picks for Raw Materials.
- megaShop™ provides flexible imports and exports for Item, BOM, Work Order / Job and inventory quantity data to and from popular accounting systems.
- megaShop™ provides labor entry functionality for job labor tracking by employee.
- megaShop™ provides a very detailed transaction history log for traceability and reporting.

BARCODING

- megaShop™ integrates with Symbol and Windows Mobile devices for data capture. Devices with integrated barcode scanners can capture barcode data that can either be uploaded to the system through a synch up or sent real-time over radio frequency.
- megaShop™ integrates with popular barcode design and print packages for barcode label design and printing.
- megaShop™ supports both laser and thermal transfer printers for barcode printing.
- megaShop™ can be configured to auto-print barcodes on any transaction.
- megaShop™ provides a Kiosk-Style entry for touchscreen job entry as well as RFID for logging labor.

CONFIGURATION

- megaShop™ forms, queries, reports, imports/exports and label printing can be configured through the megaConfig™ module, which is a great option for the customer who has need to make changes to the default configuration.
- megaShop™ provides a fully configurable user/security system so users and groups only see the forms and fields you wish them to see.
- megaShop™ data links can be configured as to meet specific data import and export needs. All megaWare™ products have the ability to attach to popular accounting systems through our pre-defined accounting system links.
- Csoft, or any of its certified resellers/consultants can provide configuration services and support for extensive customization needs.
