## qwikTrak™ Warehouse Management

**CONFIGURABLE**

**SCALABLE**

**AFFORDABLE**

qwikTrak™ is a configurable, affordable and scalable Warehouse Management System (WMS) for small to mid-size businesses. qwikTrak™ integrates with Symbol and Windows Mobile devices in batch, radio-frequency and RFID configurations. With qwikTrak™ you can manage multiple warehouses, locations and bins, over 100 fields of item attributes, lots/serials, UPC Codes, and much more. qwikTrak™ supports all of the basic transactions in warehouse management: Receipts, Shipments, Adjustments, Stock Transfers, Cycle Counts and Picking, while providing a detailed transaction history log for reporting and traceability. qwikTrak™ allows flexibility in barcode label design by integrating to popular barcode printing software packages such as Bar Tender and Loftware. qwikTrak™ can meet most basic warehouse management tracking needs...and if something a little more powerful is needed CSoft can provide an upgrade path to it's more robust WMS product, megaTrak™.

### FEATURES

- qwikTrak™ supports basic inventory transactions: Receipts, Shipments, Adjustments, Stock Transfers and Cycle Counts on both the PC and Hand-helds.
- qwikTrak™ supports directed Picking and Putaways.
- qwikTrak™ provides flexible imports and exports for part, Purchase Order, Sales Order and inventory quantity data to and from popular accounting systems.
- qwikTrak™ ships with over 25 standard queries and reports that can be customized as needed. For report customization a copy of Crystal Reports™ is needed.
- qwikTrak™ provides a very detailed transaction history log for traceability and reporting.

### BARCODING

- qwikTrak™ integrates with Symbol and Windows Mobile devices for data capture. Devices with integrated barcode scanners can capture barcode data that can either be uploaded to the system through a synch up or sent real-time over radio frequency.
- qwikTrak™ integrates with popular barcode design and print packages for barcode label design and printing.
- qwikTrak™ supports both laser and thermal transfer printers for barcode printing.
- qwikTrak™ can be configured to auto-print barcodes on any transaction.
- qwikTrak™ provides a mapping utility for mapping UPC codes to internal, customer and vendor part numbers.

### CONFIGURATION

- qwikTrak™ queries, reports, and label printing can be configured through the qwikConfig™ module, which is a great option for the customer who has need to make changes to the default configuration.
- qwikTrak™ provides a fully configurable user/security system so users and groups only see the forms and fields you wish them to see.
- qwikTrak™ data links can be configured as to meet specific data import and export needs. All qwikTrak™ products have the ability to attach to popular accounting systems through our pre-defined accounting system links.
- Csoft, or any of it's certified resellers/consultants can provide configuration services and support for extensive customization needs.
